

ACCOUNTS & FINANCIAL OPERATIONS MODULE

Complete Architecture, Chart of Accounts, Double-Entry Workflows, Standard
Operating Procedures & Financial Reporting

A comprehensive, authoritative user guide and operational standard for the Accounts
Module of the YM Construction Management System. Designed for Financial
Controllers, Accountants, Project Accountants, Treasury Officers, and Site Managers.

System Name:	YM Construction Management System (YM-CMS)
Module Scope:	General Ledger, Treasury, AP, AR, Inventory, Fixed Assets, Payroll & Reporting
Governing Entities:	BMC Construction, YMC Construction, 7-Orbit IT, 7-Orbit Medical Billing, BMC Trading
Accounting Standard:	Accrual-based Double-Entry (PKR Base Currency, Moving Weighted Average)
Security & Control:	Strict Multi-Company Tenancy & Maker-Checker Segregation of Duties
Document Version:	1.0 (Production Verified Baseline)
Release Date:	August 2026

10. Quick Reference Guide & Technical Glossary	62

1. EXECUTIVE OVERVIEW & SYSTEM ARCHITECTURE

The **YM Construction Management System (YM-CMS)** is an enterprise-grade ERP designed specifically for multi-entity construction, engineering, medical billing, and IT service conglomerates. The Accounts module serves as the central financial nervous system of the organization, enforcing strict double-entry rigor, immutable auditability, and complete multi-tenant corporate segregation.

1.1 Multi-Company Foundation & Data Isolation

The software manages multiple distinct legal entities within a single unified database instance without allowing synthetic data leakage across corporate boundaries:

- **BMC Construction:** Commercial and infrastructure civil works, heavy plant operations, and project contracting.
- **YMC Construction:** Residential and commercial construction, architectural project delivery, and site development.
- **7-Orbit:** Technology management, software development, IT services, and corporate holding operations.
- **7-Orbit Medical Billing:** Offshore healthcare revenue cycle management, medical claims processing, and healthcare BPO.
- **BMC Trading:** Material distribution, wholesale construction inputs, equipment supply, and commercial trading.

CRITICAL ARCHITECTURAL RULE: STRICT CORPORATE TENANCY

Every operational transaction, journal line, bank balance, customer balance, and inventory record belongs strictly to **one active company**. Users switch active companies via the top navigation switcher. Cross-company postings are strictly prohibited in standard vouchers; inter-company transactions must execute via dedicated paired bilateral vouchers (Due-To / Due-From).

1.2 Double-Entry Ledger: The Single Source of Truth

The accounting engine enforces classical double-entry bookkeeping across all modules. Direct modification of account balances or ledger balances in the database is strictly impossible:

- **Every financial event** originates from a balanced Journal Entry composed of at least two balanced lines.
- **Precision:** All monetary values are computed and stored at **four decimal places (decimal(19,4))** to eliminate fractional rounding discrepancies, and formatted to two decimal places (**PKR 0.00**) in UI presentations and statements.
- **Immutability:** Once a voucher is moved to the **POSTED** state, it is permanently locked. No user, administrator, or developer can edit or delete a posted journal line.
- **Reversals:** Any error correction requires a formal, authorized **REVERSE** transaction, which automatically generates a linked opposite journal entry (**REV-YYYY-XXXXXX**) in an active open financial period.

1.3 Maker-Checker Segregation of Duties Architecture

To ensure absolute internal control and prevent financial fraud, the software strictly enforces the **Maker-Checker principle** across all financial transactions:

WORKFLOW STAGE	REQUIRED ROLE	PERMITTED ACTIONS	ENFORCED CONSTRAINTS
1. Preparation (Maker)	Accounts / Site Preparer	Create, Edit draft, Add lines, Attach documents, Submit for review	Cannot Approve or Post own prepared record.
2. Verification / Review	Accounts Reviewer / Auditor	Verify supporting documents, review 3-way match, inspect variances	Must be a different user from Preparer.
3. Approval (Checker)	Finance Approver / Manager	Approve transaction, Reject with mandatory reason	Cannot approve own transaction. Checks period & budget limits.

Workflow Stage	Required Role	Permitted Actions	Enforced Constraints
4. Posting (Final Signoff)	Finance Poster / Controller	Post to General Ledger, Assign atomic voucher number	Locks record permanently; triggers GL updates & subledger impact.

1.4 High-Level Accounting Workflow Map

The diagram below illustrates how external operational events flow through verification gates and culminate in the immutable General Ledger and executive financial statements:

2. COMPLETE ACCOUNTS HIERARCHY & CLASSIFICATION STRUCTURE

The Accounts module uses a structured 4-tier chart of accounts based on international construction and manufacturing accounting standards. The system maintains an account catalog of 101 standard accounts configured across 5 major account classes.

2.1 The Standard 101-Account Structure & Major Classes

CODE RANGE	ACCOUNT CLASS / GROUP	NORMAL BALANCE	OPERATIONAL PURPOSE & TYPICAL ACCOUNTS
1000 – 1999	ASSETS	DEBIT	Economic resources owned by the company: • 1100 Current Assets: Cash (1111), Site Petty Cash (1112), Bank Accounts (1120), Accounts Receivable (1130), Employee Advances (1140), Vendor Advances (1150), Security Deposits (1160), Retention Receivable (1180), WHT Receivable (1185), Input GST (1190), Site Inventory (1196), Work in Progress (1197), Due from Related Companies (1198). • 1200 Fixed Assets: Land (1210), Buildings (1220), Plant & Machinery (1260), Vehicles (1270), Office Equipment (1280), Computers (1240), Less: Accumulated Depreciation (1290 Contra-Asset).
2000 – 2999	LIABILITIES	CREDIT	Financial obligations owed to third parties, staff, directors, and state: • 2100 Current Liabilities: Accounts Payable (2110), Contractor Payable (2120), Supplier Payable (2130), Salary Payable (2140), Staff Reimbursement Payable (2145), WHT Payable (2150), Output GST Payable (2160), Accrued Rent (2180), Retention Payable (2191), Customer Mobilization Advance (2192), GRNI Clearing (2193), Due to Related Companies (2195). • 2200 Long-Term Liabilities: Bank Loans (2210), Director Loans / Financing (2220), Partner Loans (2230), Vehicle Lease Obligations (2240).
3000 – 3999	EQUITY / CAPITAL	CREDIT	Shareholders' and owners' residual interest in company assets: • 3100 Paid-up Capital: Founder and partner equity contributions. • 3200 Retained Earnings: Cumulative historical net profits/losses. • 3300 Current Year Profit / Loss: System-calculated real-time net result.
4000 – 4999	REVENUE / INCOME	CREDIT	Gross earnings generated from operational trading and contracting: • 4100 Construction Revenue: Certified running bill progress earnings. • 4200 IT Services Revenue: Software development, hosting & technical consulting. • 4300 Medical Billing Revenue: Medical RCM and claims commission earnings. • 4400 Trading Sales: Commercial building material and item sales. • 4500 Consultancy Income: Professional engineering and advisory fees. • 4700 Other Income: Scrap sales, interest, and gain on asset disposals.

CODE RANGE	ACCOUNT CLASS / GROUP	NORMAL BALANCE	OPERATIONAL PURPOSE & TYPICAL ACCOUNTS
5000 – 6999	OPERATING & ADMIN EXPENSES	DEBIT	Head office overheads, administrative, and corporate costs: • 5050–5058 Bidding Expenses: Pre-award tender fees, bid bonds, drawings. • 5100 Head Office Salaries: Administrative, management & director remuneration. • 5200–5500 Utilities & Rent: Fuel (5200), Office Rent (5300), Power/Gas (5400), Internet (5500). • 5600–6000 Maintenance & Transport: Vehicle Rent (5600), Printing (5700), Stationery (5800), Repairs (5900), Vehicle Maintenance (6000). • 6100 Depreciation: Monthly asset depreciation write-offs. • 6200–6800 Marketing & Legal: Marketing (6200), Legal (6300), Audit (6400), Travel (6800).
7000 – 7999	DIRECT PROJECT COSTS	DEBIT	Job-site direct construction costs (Requires mandatory Project tagging): • 7100–7180 Structural Materials: Cement (7100), Steel (7110), Sand (7120), Crush (7130), Bricks (7140), Electrical (7150), Plumbing (7160), Paint (7170), Tiles (7180). • 7190 Direct Site Labour: Daily wages, masons, carpenters, site staff. • 7200–7230 Equipment & Heavy Machinery: Machinery Rental (7200), Excavation (7210), Concrete Pump (7220), Shuttering & Scaffolding (7230). • 7240–7280 Site Overheads: Safety Gear (7240), Site Office (7250), Site Utilities (7260), Site Security (7270), Project Transportation (7280).

2.2 Account Types & Normal Balances

The software enforces exact debit/credit mechanics based on the fundamental accounting equation:

$$\text{ASSETS} + \text{EXPENSES} + \text{DIRECT COSTS} = \text{LIABILITIES} + \text{EQUITY} + \text{REVENUE}$$

ACCOUNT TYPE	NORMAL BALANCE	DEBIT EFFECT (+)	CREDIT EFFECT (-)	FINANCIAL STATEMENT DESTINATION
Asset	Debit	Increases Asset Balance	Decreases Asset Balance	Balance Sheet (Assets)
Liability	Credit	Decreases Liability Balance	Increases Liability Balance	Balance Sheet (Liabilities)
Equity	Credit	Decreases Equity (Drawings)	Increases Equity (Capital/Profit)	Balance Sheet (Equity)
Revenue	Credit	Decreases Revenue (Sales Returns)	Increases Revenue (Earned Sales)	Profit & Loss (Income)
Expense	Debit	Increases Expense (Incurred Cost)	Decreases Expense (Rebate/Discount)	Profit & Loss (Overheads)

2.3 Control Accounts vs. Posting Leaf Accounts

To preserve ledger purity and prevent accidental manual postings to complex automated balances, the system distinguishes between two operational account categories:

- **Control Accounts (`is_control_account = true`):** These accounts represent aggregated master balances backed by dedicated subsidiary ledgers (such as Accounts Receivable backed by Customer Subledgers, Accounts Payable backed by Vendor Subledgers, or Site Inventory backed by Stock Ledgers).

CONTROL ACCOUNT PROTECTION RULE

Manual journal entry posting directly to Control Accounts is **strictly blocked** (`allows_manual_posting = false`). Control accounts can only receive entries generated by automated operational workflows (e.g. Vendor Bills, Customer Invoices, Goods Receipts, Treasury Allocations) that carry mandatory subledger dimensions.

- **Posting Leaf Accounts** (`allows_manual_posting = true`): Active leaf accounts at the bottom of the hierarchy tree with no child accounts that permit direct manual voucher entry (e.g. 5200 Fuel, 5300 Office Rent, 1111 Head Office Cash).
- **Parent / Group Accounts**: Summary nodes in the tree (e.g. 1000 Assets, 1100 Current Assets, 5000 Expenses). Postings to parent accounts are strictly rejected by the database schema; they exist solely for hierarchy aggregation in financial reporting.

2.4 Multi-Dimensional Subledgers & Dimension Tagging

Rather than creating separate GL accounts for every customer, vendor, site, or project (which leads to Chart of Accounts explosion), YM-CMS uses a **Multi-Dimensional Tagging Architecture**. Every Journal Line captures:

DIMENSION	ASSOCIATED MODEL	WHEN MANDATORY	DOWNSTREAM REPORTING IMPACT
Party ID	<code>App\Models\Party</code>	Mandatory on AR (1130), AP (2110), Vendor Advances (1150), Customer Advances (2192).	Customer Ledger, Vendor Ledger, AP/AR Aging Schedules, Party Statements.
Project ID	<code>App\Models\Project</code>	Mandatory on all Direct Project Costs (7000–7290) and Construction Running Bills (4100).	Project Profitability Report, Project Budget-vs-Actual, Project Expense Ledger.
Project Site ID	<code>App\Models\ProjectSite</code>	Mandatory on Site Inventory (1196), GRNI Clearing (2193), and Store Issues.	Site Inventory Balances, Material Movement Register, Store Stock Ledger.
Cost Center ID	<code>App\Models\CostCenter</code>	Optional/Required by policy on Head Office Overheads (5000s).	Departmental Cost Analysis, Administrative Overhead Breakdown.
Employment ID	<code>App\Models\Employment</code>	Mandatory on Salary Payable (2140), Employee Advances (1140), Staff Payable (2145).	Employee Advance Ledger, Individual Salary Settlement, Clearance Audit.
Company Bank ID	<code>CompanyBankAccount</code>	Mandatory on all Bank GL Accounts (1120 series).	Bank Book, Treasury Position Statement, Bank Reconciliation Register.
Fixed Asset ID	<code>App\Models\FixedAsset</code>	Mandatory on Asset Additions (1200s), Depreciation (6100), and Disposals.	Fixed Asset Register, Asset Depreciation Schedule, Asset Custody Ledger.
Related Company ID	<code>App\Models\Company</code>	Mandatory on Due from Related (1198) and Due to Related (2195).	Inter-Company Bilateral Reconciliation, Elimination for Group Consolidation.

2.5 Core System Accounting Mappings (The 26 Mapping Keys)

The system maps operational events to General Ledger accounts via 26 standardized system keys defined in `App\Enums\AccountingMappingKey`. Every active company is provisioned with these mappings to guarantee automated posting integrity:

SYSTEM MAPPING KEY	DEFAULT GL CODE & NAME	ACCOUNT TYPE	TRIGGERING OPERATIONAL WORKFLOW
<code>default_cash</code>	1111 Head Office Cash	Asset	Cash payments, cash receipts, cash top-ups.
<code>bank_accounts</code>	1120 Company Bank Accounts	Asset	Cheque / Electronic bank transactions, statement imports.
<code>accounts_receivable</code>	1130 Accounts Receivable (Control)	Asset	Customer Invoices, Running Bills, Credit Notes, AR Receipts.
<code>accounts_payable</code>	2110 Accounts Payable (Control)	Liability	Vendor Bills, Subcontractor Bills, AP Payments.
<code>employee_advances</code>	1140 Employee Advances (Control)	Asset	HR Loans, Emergency Salary Advances, Payroll Deductions.
<code>vendor_advances</code>	1150 Vendor Advances (Control)	Asset	Advance mobilizations paid to suppliers/subcontractors.
<code>input_tax</code>	1190 Input GST / Sales Tax	Asset	Recoverable sales tax paid on vendor purchases and materials.
<code>output_tax</code>	2160 Output GST / Sales Tax Payable	Liability	Sales tax charged to clients on construction/service bills.
<code>wht_receivable</code>	1185 WHT Receivable	Asset	Income tax withheld at source by clients upon paying our bills.
<code>wht_payable</code>	2150 WHT Payable	Liability	Income tax withheld by us from vendor bills & staff payroll.
<code>salary_payable</code>	2140 Salary Payable (Control)	Liability	Monthly payroll postings prior to net bank/cash disbursement.
<code>retention_receivable</code>	1180 Retention Receivable	Asset	5-10% contract security withheld by clients from progress bills.
<code>retention_payable</code>	2191 Retention Payable	Liability	Security withheld by us from subcontractor work certificates.
<code>customer_advances</code>	2192 Customer Mobilization Advances	Liability	Upfront unearned advance funds received from clients.
<code>grni</code>	2193 Goods Received Not Invoiced	Liability	Temporary accrual clearing account at GRN handover stage.
<code>site_inventory</code>	1196 Project / Site Inventory	Asset	Valuation of materials held at stores at moving average cost.
<code>work_in_progress</code>	1197 Construction Work In Progress	Asset	Uncertified direct construction costs on active job sites.
<code>due_from_related_companies</code>	1198 Due from Related Companies	Asset	Receivable due from sister company for shared expenses paid.
<code>due_to_related_companies</code>	2195 Due to Related Companies	Liability	Payable due to sister company for expenses absorbed on our behalf.
<code>retained_earnings</code>	3200 Retained Earnings	Equity	Cumulative historical profits/losses transferred at Year-End.
<code>current_year_result</code>	3300 Current Year Profit / Loss	Equity	System-calculated dynamic closing result of current fiscal year.

SYSTEM MAPPING KEY	DEFAULT GL CODE & NAME	ACCOUNT TYPE	TRIGGERING OPERATIONAL WORKFLOW
site_petty_cash	1112 Site Petty Cash	Asset	Job-site cash floats for emergency and daily expenses.
director_cash_advance	1113 Director Cash Advance	Asset	Company funds temporarily advanced to director for company use.
director_loan	2220 Director Loans / Financing	Liability	Personal funds injected by Director to pay company expenses.
staff_reimbursement_payable	2145 Staff Reimbursement Payable	Liability	Out-of-pocket claims owed to employees for company expenses.
rental_payable	2180 Rental Payable / Accrued Rent	Liability	Accrued machinery and office rental obligations.

2.6 Visual Master Accounting Hierarchy Tree

```

3. COMPREHENSIVE SCREEN & COMPONENT DIRECTORY

This section documents every screen, form, table, button, workflow transition, and configuration interface implemented in the software.

3.1 Master Configuration: COA, Settings, Periods & Voucher Sequences

Screen 3.1.1: Chart of Accounts (AccountResource)

- **Navigation:** ACCOUNTING \$rightarrow\$ CHART OF ACCOUNTS (/admin/accounts)
- **Purpose:** View, create, and maintain the company's active chart of accounts. Enables activation of leaf accounts and controls manual posting permissions.
- **Who Uses It:** Chief Financial Officer, Head of Accounts, System Administrator.
- **Form Fields & Meaning:**

FIELD NAME	TYPE / RULES	FUNCTIONAL DEFINITION & ACCOUNTING MEANING
code	Text (Req, Max 50)	Unique alphanumeric GL code (e.g. 5200 , 7100). Must be unique within the active company.
name	Text (Req, Max 255)	Descriptive legal account title (e.g. Site Fuel & Generator Expense).
parent_id	Select (Searchable)	Parent group under which this account nests (e.g. 5000 Operating Expenses).
account_type	Select (Req)	Asset, Liability, Equity, Revenue, Expense. Controls balance behavior & statement destination.
normal_balance	Select (Req)	Debit or Credit. Dictates whether positive balance represents Dr or Cr.
reporting_group	Text (Req)	Reporting tag used for multi-company consolidation (e.g. Direct Material).
is_control_account	Toggle (Live)	If enabled, marks account as a subledger master. Automatically disables manual posting.
allows_manual_posting	Toggle	If false, blocks manual voucher preparation. Required true for manual JV leaf accounts.
is_active	Toggle (Default: true)	If false, hides account from entry dropdowns while preserving historical postings.

- **Immutability & Safety:** Accounts that possess posted journal lines cannot be deleted or assigned a parent from a conflicting account class.

Screen 3.1.2: Accounting Settings (AccountingSettingResource)

- **Navigation:** ACCOUNTING \$rightarrow\$ ACCOUNTING SETTINGS
- **Purpose:** Governs company-wide fiscal year rules, base currency, timezone, and inventory policies.
- **Standard Values:** Base Currency = PKR , Timezone = Asia/Karachi , Fiscal Year Start = July 1 , Fiscal Year End = June 30 , Inventory Valuation = Moving Weighted Average , Allow Negative Inventory = false .

Screen 3.1.3: Financial Years & Periods (FinancialYearResource , FinancialPeriodResource)

- **Navigation:** ACCOUNTING \$rightarrow\$ FINANCIAL YEARS & FINANCIAL PERIODS
- **Purpose:** Defines the 12 monthly accounting periods (e.g. July 2026 to June 2027) per fiscal year.
- **Period Lifecycle States:**
 - OPEN : Transactions can be posted with transaction dates within the period date boundaries.
 - CLOSED : Regular posting is halted at month-end. Can be reopened with authorized reason.
 - LOCKED : Permanently sealed (typically after audit / year-end). Reopening requires high-severity audit logging.

- **Header Actions:** **CLOSE PERIOD** , **REOPEN PERIOD** (Requires explicit reason text and audit tracking).

Screen 3.1.4: Voucher Sequences (`VoucherSequenceResource`)

- **Navigation:** **ACCOUNTING** $\rightarrow$ **VOUCHER SEQUENCES**
- **Purpose:** Manages gapless, atomic sequential numbering across 14 voucher types per fiscal year.
- **Fields:** `voucher_type` , `prefix` (e.g. `JV` , `PV` , `RV` , `PUR` , `SAL`), `financial_year_id` , `next_number` (Auto-incremented), `padding` (Default 6 digits: `JV-2026-000001`).

3.2 Core Vouchers & Manual Journal Entries (`JournalEntryResource`)

- **Navigation:** `ACCOUNTING` $\rightarrow$ `VOUCHERS / JOURNALS` (`/admin/journal-entries`)
- **Purpose:** The primary interface for preparing, reviewing, approving, posting, and reversing general journal entries, payment vouchers, receipt vouchers, contra vouchers, debit notes, and credit notes.
- **Who Uses It:** Accounts Officers (Preparers), Finance Managers (Approvers), Controllers (Posters).

Voucher Header Form Schema

FIELD	RULES / OPTIONS	DESCRIPTION & ACCOUNTING VALIDATION
<code>voucher_type</code>	Select (Required)	<code>journal</code> (JV), <code>payment</code> (PV), <code>receipt</code> (RV), <code>contra</code> (CV), <code>debit_note</code> (DN), <code>credit_note</code> (CN).
<code>financial_period_id</code>	Select (Searchable, Req)	Must select an active <code>OPEN</code> period that contains the <code>transaction_date</code> .
<code>transaction_date</code>	DatePicker (Required)	Effective accounting date. Dictates report period placement.
<code>reference</code>	Text (Max 120)	External reference (e.g. Cheque No., Supplier Invoice No., Bank Slip No.).
<code>currency_code</code>	Text (Default: 'PKR')	Base operating currency.
<code>description</code>	Textarea (Required)	Comprehensive transaction narration explaining business rationale.

Repeater: Double-Entry Lines (`lines`)

Requires a minimum of 2 lines. Automatically attaches the active tenant `company_id`:

COLUMN NAME	TYPE / RULES	DESCRIPTION & RULES ENFORCED
<code>account_id</code>	Select (Searchable, Req)	Filtered to active leaf accounts with no children (<code>is_active = true</code>). Displays code + name.
<code>debit</code>	Numeric (Min 0)	Debit amount in PKR. Exactly one of Debit or Credit must be greater than zero.
<code>credit</code>	Numeric (Min 0)	Credit amount in PKR. Cannot enter both Debit and Credit on the same line.
<code>party_id</code>	Select (Searchable)	Customer / Vendor party dimension. Mandatory if account is AR or AP.
<code>project_id</code>	Select (Searchable)	Project dimension. Mandatory on Direct Project Cost accounts (7000s).
<code>project_site_id</code>	Select (Searchable)	Job-site / Store dimension for material allocations.
<code>cost_center_id</code>	Select (Searchable)	Department / Cost Center overhead tag.
<code>employment_id</code>	Select (Searchable)	Employee dimension. Mandatory on Salary/Advance accounts.
<code>company_bank_account_id</code>	Select (Searchable)	Bank account dimension. Mandatory on Bank GL accounts (1120).
<code>description</code>	Text (Optional)	Line-level narration / memo for itemized statement reporting.

Voucher Lifecycle & Action Buttons

WORKFLOW ACTION	BUTTON APPEARANCE	VISIBLE WHEN STATUS IS	REQUIRED PERMISSION	EXECUTION LOGIC & STATE CHANGE
Submit	<code>SUBMIT</code>	<code>DRAFT</code>	<code>submit</code>	Validates balanced debits/credits (<code>\sum Dr = \sum Cr > 0\$</code>), checks open period. Moves status to <code>SUBMITTED</code> .
Approve	<code>APPROVE</code>	<code>SUBMITTED</code>	<code>approve</code>	Checker signoff. Validates Maker <code>\\$inner\$.Checker</code> . Snapshots lines. Moves status to <code>APPROVED</code> .
Reject	<code>REJECT</code>	<code>SUBMITTED</code> / <code>APPROVED</code>	<code>reject</code>	Opens modal requiring <code>reason</code> text. Returns voucher to <code>REJECTED</code> (editable for correction).

WORKFLOW ACTION	BUTTON APPEARANCE	VISIBLE WHEN STATUS IS	REQUIRED PERMISSION	EXECUTION LOGIC & STATE CHANGE
Post	POST	APPROVED	post	Assigns atomic voucher number (JV-2026-000001), updates GL balances, locks lines permanently. Status \$rightarrow\$ POSTED.
Reverse	REVERSE	POSTED	reverse	Requires reversal_date & reason . Generates linked opposite journal entry. Status \$rightarrow\$ REVERSED.

3.3 Treasury: Payments, Receipts, Transfers & Bank Reconciliation

Screen 3.3.1: Treasury Transactions (`TreasuryTransactionResource`)

- **Navigation:** **TRANSACTIONS** $\rightarrow$ **PAYMENTS, RECEIPTS & TRANSFERS** (`/admin/treasury-transactions`)
- **Purpose:** Comprehensive liquid cash and bank disbursement/inflow management, supporting open-item bill settlement, employee advances, and inter-account transfers.
- **Transaction Types & Accounting Routing:**

TYPE (<code>TYPE</code>)	PURPOSE (<code>PURPOSE</code>)	SOURCE (CREDIT SIDE)	DESTINATION (DEBIT SIDE)	SUPPORTED OPEN-ITEM ALLOCATIONS
PAYMENT	settlement	Company Bank (1120) or Cash (1111)	Accounts Payable (2110) or Salary Payable (2140)	Allocates against posted Vendor Bills, Payroll Entries, Final Settlements.
PAYMENT	advance	Company Bank (1120) or Cash (1111)	Vendor Advances (1150) or Employee Advances (1140)	Increases counterparty advance subledger balance.
RECEIPT	settlement	Accounts Receivable (1130)	Company Bank (1120) or Cash (1111)	Allocates against posted Customer Invoices & Running Bills.
RECEIPT	advance	Customer Advances (2192)	Company Bank (1120) or Cash (1111)	Increases customer mobilization liability.
TRANSFER	other	Source Bank / Cash Account	Destination Bank / Cash Account	Same-company Contra Transfer (CV). Both accounts must be same entity.

- **Repeater: Open-Item Allocations (`allocations`):**
 - Allows partial or full settlement of posted open items.
 - Enforces that total allocated amount does not exceed the payment/receipt amount or the remaining open balance of the document.
 - Dynamically filters posted unpaid bills for the selected Vendor, or unpaid invoices for the selected Customer, or unpaid payroll runs for the selected Employee.

Screen 3.3.2: Bank Statements (`BankStatementResource`)

- **Navigation:** **TRANSACTIONS** $\rightarrow$ **BANK STATEMENTS**
- **Purpose:** Secure, normalized import of official bank statement CSV files for electronic bank reconciliation.
- **Validation & Security:** Validates strict CSV headers (`transaction_date` , `value_date` , `description` , `bank_reference` , `debit` , `credit` , `balance`), verifies running balance continuity against opening and closing balances, computes SHA-256 fingerprint per row to prevent duplicate uploads, and performs atomic database rollback on any parsing failure.

Screen 3.3.3: Bank Reconciliation (`BankReconciliationResource`)

- **Navigation:** **ACCOUNTING** $\rightarrow$ **BANK RECONCILIATION**
- **Purpose:** Match imported bank statement lines against posted General Ledger bank activity, record adjusting entries (bank charges, withholding tax, interest), and lock the reconciled period.
- **Reconciliation Screen Actions (`ViewBankReconciliation`):**
 - **MATCH ACTIVITY** : Selects an imported statement line and a posted GL journal line of identical amount. Creates an immutable `BankReconciliationMatch` link. Supports 1-to-many and partial matching.
 - **REMOVE MATCH** : Unlinks a matched pair while reconciliation is **OPEN**.
 - **POST ADJUSTMENT** : Generates a direct balancing adjustment journal (e.g. Dr 5400 Bank Charges / Cr 1120 Bank) for unmatched items appearing on the bank statement.
 - **CLOSE RECONCILIATION** : Validates that **Bank Statement Closing Balance == Adjusted General Ledger Balance** (Variance = 0.00). Locks the reconciliation period.

- **REOPEN**: Allows reopening closed reconciliation with mandatory reason text and audit trail.

3.4 Accounts Payable: 3-Way Matching, Vendor Bills & Credit Notes

Screen 3.4.1: Vendor Bills & Credit Notes (VendorBillResource)

- **Navigation:** TRANSACTIONS \$rightrightarrow\$ VENDOR BILLS & CREDIT NOTES (/admin/vendor-bills)
- **Purpose:** Recording vendor invoices, subcontractor progress claims, direct service bills, and vendor credit notes with rigorous 3-Way Matching against issued Purchase Orders and accepted Goods Receipts.
- **Who Uses It:** Procurement Officers, Accounts Payable Accountants, Finance Approvers.

Form Architecture & Matching Engine

SECTION	KEY FIELDS	OPERATIONAL & ACCOUNTING LOGIC
Vendor Document Header	type (Invoice/Credit Note), purchase_order_id , vendor_id , vendor_invoice_number , invoice_date , due_date , project_id , project_site_id .	Links the bill to an issued PO. vendor_invoice_number is uniquely checked per vendor to eliminate duplicate invoice entry.
Invoice Lines (Repeater)	purchase_order_line_id , item_id , unit_of_measure_id , quantity , unit_rate , tax_code_id , clearing_account_id , variance_account_id .	FIFO GRN Consumption: At submission, stock lines automatically allocate FIFO against accepted, inspected, and handed-over GRN quantities. Quantity cannot exceed remaining handed-over stock.
Deductions & Withholding	type (wht , retention , vendor_advance , other), tax_code_id , amount , account_id .	Calculates income tax withholding (Cr 2150 WHT Payable), contract retention (Cr 2191 Retention Payable), or advance recovery (Cr 1150 Vendor Advances). Deductions reduce net Accounts Payable.

3-Way Matching Workflow States & Actions

The workflow enforces a dedicated review step (ReviewVendorBillMatchAction) between submission and approval:

[Draft]

??(Submit)??

[Submitted]

??(Review Match)??

[Reviewed]

??(Approve)??

[Approved]

??(Post)??

[Posted]

?

???(Mismatch Detected / Override Required)

?

???(Reject)??

[Rejected]

- **Review Match Action:** Evaluates PO Rate vs Invoice Rate, and PO GRN Accepted Quantity vs Invoiced Quantity.
 - If parameters match within tolerance (ApMatchingSetting = 0.00% default), status advances to REVIEWED .
 - If a rate or quantity mismatch occurs, approval is blocked unless a user with dedicated Override AP Match permission explicitly checks override_mismatch and supplies a detailed mismatch_reason .
- **Posting Accounting Effect (PostVendorBillAction):**
 - **Stock Line:** DR 2193 GRNI Clearing (Clears GRN accrual) + DR 1190 Input Tax (if recoverable) + DR/CR Price Variance \$rightrightarrow\$ CR 2110 Accounts Payable + CR 2150 WHT Payable + CR 2191 Retention Payable .
 - **Service Line:** DR 7000s Direct Project Cost or 5000s Expense \$rightrightarrow\$ CR 2110 Accounts Payable .

Screen 3.4.2: AP Match Tolerances (ApMatchingSettingResource)

- **Navigation:** ADMINISTRATION \$rightrightarrow\$ AP MATCH TOLERANCES
- **Purpose:** Configures acceptable percentage and monetary variance thresholds for 3-way matching. Defaults to zero tolerance (\$0.00\%\$).

3.5 Accounts Receivable: Running Bills, Invoices & Sales (CustomerInvoiceResource)

- **Navigation:** TRANSACTIONS \$\\rightarrow\$ CUSTOMER INVOICES & CREDIT NOTES (/admin/customer-invoices)
- **Purpose:** Complete billing engine for Construction Progress Claims (Running Bills / IPC), IT & Medical Service Invoices, and Commercial Trading Sales.
- **Invoice Categories:**

CATEGORY (CATEGORY)	REQUIRED OPERATIONAL DIMENSIONS	LINE & DEDUCTION ARCHITECTURE	ACCOUNTING & INVENTORY IMPACT
RUNNING BILL	Mandatory project_id , certificate_number , certificate_date , work_value , variation_amount .	Revenue lines mapped to 4100 Construction Revenue . Deductions capture Contract Retention (1180), Advance Mobilization Recovery (2192), and WHT (1185).	DR 1130 Accounts Receivable (Net) DR 1180 Retention Receivable DR 1185 WHT Receivable DR 2192 Customer Advance CR 4100 Construction Revenue CR 2160 Output Tax Payable
SERVICE INVOICE	Customer Party, optional Project / Cost Center.	Service item lines mapped to 4200 IT Revenue or 4300 Medical Billing Revenue with Sales Tax codes.	DR 1130 Accounts Receivable CR 4200/4300 Service Revenue CR 2160 Output Tax Payable
TRADING SALE	Customer Party, inventory_site_id , Stock-tracked Items.	Material lines with quantity, rate, revenue_account_id (4400) and cogs_account_id (5000/7000).	Balanced Revenue Entry: DR 1130 Accounts Receivable CR 4400 Trading Sales Automatic COGS Stock Entry: DR Cost of Goods Sold CR 1196 Site/Store Inventory (at Moving Average Cost)

3.6 Site Inventory Accounting & GRNI Handover

Screen 3.6.1: Goods Receipts & Inspection (GoodsReceiptResource)

- **Navigation:** TRANSACTIONS \$\\rightarrow\$ GOODS RECEIPTS & INSPECTION
- **3-Stage Material Control Process:**
 1. **Receive Goods (ReceiveGoodsAction):** Storekeeper logs physical delivery against issued PO lines. Locks PO line quantities; assigns GRN-YYYY-XXXXXX .
 2. **QA Inspection (InspectGoodsReceiptAction):** Site Engineer inspects quality. Must enter accepted_quantity and rejected_quantity (Accepted + Rejected = Received). Rejected goods are returned immediately and never enter

stock.

3. **Accounts Handover (`HandoverGoodsReceiptToAccountsAction`):** Store Supervisor executes financial handover. Automatically updates site inventory quantity and moving average unit cost, creates immutable stock movements, and generates balanced double-entry accrual journal:
- \$\rightarrow\$ **DR** 1196 Project/Site Inventory | **CR** 2193 Goods Received Not Invoiced (GRNI) .

Screen 3.6.2: Inventory Transfers & Issues (`InventoryTransactionResource`)

- **Navigation:** **TRANSACTIONS** \$\rightarrow\$ **INVENTORY TRANSFERS & ISSUES**
- **Transaction Types & Impact:**
 - **Material Issue to Project:** Consumes inventory from store for direct job installation.
\$\rightarrow\$ **DR** 7100s Direct Project Cost (Cement/Steel/etc.) [With Project ID] | **CR** 1196 Site Inventory .
 - **Inter-Site Transfer:** Moves material from Central Store to Site Store. Transfers at current moving weighted-average cost. No GL entry is created because both sites belong to the same company inventory control account.
 - **Inventory Adjustment:** Physical count surplus/shrinkage adjustment:
\$\rightarrow\$ Shrinkage: **DR** 5900 Inventory Loss / Adjustment | **CR** 1196 Site Inventory .

3.7 Fixed Assets, Asset Register & Monthly Depreciation

Screen 3.7.1: Fixed Assets Register (FixedAssetResource)

- **Navigation:** **ASSETS** $\rightarrow$ **FIXED ASSETS** (/admin/fixed-assets)
- **Purpose:** Master register of capitalized tangible capital assets (vehicles, concrete batching plants, excavators, server hardware, office premises).
- **Form Sections & Core Fields:**

SECTION	FIELD	TYPE / RULES	ACCOUNTING & ASSET TRACKING PURPOSE
Asset Identity	asset_number	Text (Req, Unique)	Internal tag / barcode number (e.g. FA-VEH-001 , FA-PLT-024).
	name	Text (Req)	Full asset description (e.g. Hino Dump Truck 10-wheeler).
	asset_category_id	Select (Req)	Asset Category (Vehicles, Machinery, Computers, Buildings).
Acquisition & Depreciation	acquisition_source	Select (Req)	manual , vendor_bill , or opening_balance .
	acquired_on	DatePicker (Req)	Purchase date.
	available_for_use_on	DatePicker (Req)	In-service date. Depreciation calculation begins from this month.
	acquisition_cost	Numeric (Req)	Gross capitalized cost in PKR (decimal(19,4)).
	residual_value	Numeric (Default 0)	Estimated salvage / scrap value at end of useful life.
	useful_life_months	Numeric (Req, Min 1)	Total depreciable lifespan in months (e.g. 60 months = 5 years).
Assignment	custodian_employment_id	Select	Staff member or driver holding custody of the asset.
	project_id / site_id	Select	Job-site or store location where the asset is deployed.

- **Capitalization Accounting Entry (CapitalizeFixedAssetAction):**
 $\rightarrow$ **DR** 1200s Fixed Asset Class Account | **CR** 2110 Accounts Payable (or 1120 Bank / Capitalization Credit).

Screen 3.7.2: Depreciation Runs (DepreciationRunResource)

- **Navigation:** **ASSETS** $\rightarrow$ **DEPRECIATION RUNS**
- **Purpose:** Monthly automated batch depreciation calculation across all active, capitalized fixed assets using the **Straight-Line Depreciation Method**.
- **Calculation Formula:**

Monthly Depreciation = (Acquisition Cost - Residual Value) / Useful Life in Months

- **Depreciation Posting Accounting Effect (PostDepreciationRunAction):**
 $\rightarrow$ **DR** 6100 Depreciation Expense (Operating Overhead)
 $\rightarrow$ **CR** 1290 Accumulated Depreciation (Contra-Asset Account for Asset Class)

Screen 3.7.3: Asset Disposals (AssetDisposalResource)

- **Navigation:** **ASSETS** $\rightarrow$ **ASSET DISPOSALS**

- **Purpose:** Retires assets sold, scrapped, or lost. Computes Book Value ($\text{Cost} - \text{Accumulated Depreciation}$) and recognizes Gain/Loss on Disposal.

- **Disposal Accounting Entry:**

$\rightarrow$ **DR** 1120 Bank / Cash (Sale Proceeds Received)
 $\rightarrow$ **DR** 1290 Accumulated Depreciation (Clears historical depreciation)
 $\rightarrow$ **DR** 5900 Loss on Asset Disposal (if Proceeds < Book Value)
 $\rightarrow$ **CR** 1200s Fixed Asset Cost Account (Clears gross asset cost)
 $\rightarrow$ **CR** 4700 Gain on Asset Disposal (if Proceeds > Book Value)

3.8 Operational Expenses, Petty Cash, Bidding & Director Ledgers

Screen 3.8.1: Quick Expense Entry (QuickExpenseEntryPage)

- **Navigation:** ACCOUNTS → QUICK EXPENSE ENTRY (/admin/quick-expense-entry)
- **Purpose:** Fast operational voucher creation with smart category defaults. Users enter date, expense head, amount, and payment method without writing manual debit/credit lines. The system automatically constructs, balances, and submits the journal voucher.
- **Supported Payment Methods & Automatic Liability Routing:**
 - **Cash:** Credits 1111 Head Office Cash .
 - **Bank:** Credits selected Company Bank Account (1120).
 - **Petty Cash:** Credits 1112 Site Petty Cash .
 - **Director Funded:** Automatically routes to 2220 Director Loans (Credit), recording the company's liability to repay the director.
 - **Staff Out-of-Pocket:** Automatically routes to 2145 Staff Reimbursement Payable (Credit).
- **Mandatory Project Enforcement:** If the selected category is a Direct Project Cost (Cement, Steel, Sand, Crush, Bricks, Site Labour, Machinery Rental, Excavation, Shuttering), the project_id field is strictly mandatory.

Screen 3.8.2: Petty Cash Register & Reconciliation (PettyCashRegisterPage)

- **Navigation:** ACCOUNTS → PETTY CASH REGISTER (/admin/petty-cash-register)
- **Purpose:** Replicates the classical imprest petty cash book showing chronological receipts, disbursements, and real-time running cash float balances.
- **Interactive Modals & Operations:**

ACTION	BUTTON	INPUT FIELDS	ACCOUNTING & BALANCE IMPACT
Record Petty Expense	RECORD PETTY EXPENSE	Date, Expense Head, Amount, Project (Optional), Narration.	DR Expense Account CR 1112 Site Petty Cash . Immediately reduces float.
Top-up Float	TOP-UP FLOAT	Date, Source (director , bank , head_office_cash), Amount, Memo.	DR 1112 Site Petty Cash CR 2220 Director Loan / 1120 Bank / 1111 Cash . Replenishes float.
Physical Reconciliation	PHYSICAL RECONCILIATION	Date, Physical Counted Cash (PKR), On-Account Held Cash (PKR), Notes.	Computes: $\text{System Balance} - (\text{Physical Cash} + \text{On-Account Held}) = \text{Variance}$ \$. Records physical count audit log.

Screen 3.8.3: Director Expense Ledger (DirectorExpenseLedgerPage)

- **Navigation:** ACCOUNTS → DIRECTOR EXPENSE LEDGER
- **Purpose:** Dedicated current account ledger tracking personal funds injected by directors to support company operations versus company repayments to directors. Tracks running net balance owed to/from directors.

Screen 3.8.4: Bidding & Tender Expenses (BiddingExpenseLedgerPage)

- **Navigation:** ACCOUNTS → BIDDING & TENDER EXPENSES
- **Purpose:** Itemized tracking of pre-award tender acquisition expenses (accounts 5050–5058 : Tender Documents, Bid Security, Estimation, Architectural Drawings, Client Meetings).
- **Capitalization to Awarded Project:** Features an action to transfer and capitalize accumulated pre-award bidding costs directly into an awarded project's direct cost accounts (7000s) upon winning a contract award.

Screen 3.8.5: Project / Phase Expense Ledger (ProjectExpenseLedgerPage)

- **Navigation:** PROJECTS → PROJECT EXPENSE LEDGER

- **Purpose:** Deep-dive construction cost reporting grouped into 3 operational buckets:
 1. **Materials:** Cement, Steel, Sand, Crush, Bricks, Electrical, Plumbing, Paint, Tiles.
 2. **Labour & Equipment:** Daily Site Wages, Machinery Rental, Excavation, Concrete Pump, Shuttering.
 3. **Site Overheads:** Safety Gear, Site Office, Site Utilities, Site Security, Project Transportation.

Screen 3.8.6: Monthly / FY Expense Summary Book (MonthlyExpenseSummaryPage)

- **Navigation:** **REPORTS** $\rightarrow$ **MONTHLY EXPENSE SUMMARY**
- **Purpose:** Executive summary replicating the 10-sheet structure of corporate expense books. Summarizes Head Office Overheads, Bidding Expenses, Project Direct Costs, Shared Costs, and Funding Sources breakdown (Cash, Bank, Petty Cash, Director Loans, Staff Payables).

Screen 3.8.7: Shared Cost Allocation (SharedCostAllocationPage)

- **Navigation:** **ACCOUNTS** $\rightarrow$ **SHARED COST ALLOCATION**
- **Purpose:** Automates the distribution of shared utility bills, corporate rent, and shared staff costs paid by one entity (e.g. YM Construction) on behalf of sister companies (7-Orbit, BMC Trading).
\$ $\rightarrow$ **Paying Company Entry:** **DR** Own Expense (Share) + **DR** 1198 Due from Sister Co $\rightarrow$ **CR** 1120 Bank / 1111 Cash .
 $\rightarrow$ **Recipient Company Entry:** **DR** Expense (Share) $\rightarrow$ **CR** 2195 Due to Paying Co .

Screen 3.8.8: Daily Cash & Bank Position Statement (DailyCashBankPositionPage)

- **Navigation:** **REPORTS** $\rightarrow$ **DAILY CASH & BANK STATEMENT**
- **Purpose:** Executive 5-Fund Daily Position statement showing Opening Balance, Itemized Receipts, Itemized Payments, and Closing Balances across: (1) Head Office Cash, (2) Site Petty Cash, (3) Company Bank Accounts, (4) Director Funded Activities, and (5) Staff Payables. Features dedicated print stylesheet.

3.9 Opening Balances & Year-End Closings

Screen 3.9.1: Opening Balances (`OpeningBalanceBatchResource`)

- **Navigation:** `ACCOUNTING` $\rightarrow$ `OPENING BALANCES`
- **Purpose:** Controlled migration and setup of historical opening Trial Balances when onboarding a company into the system.
- **Validation & Posting:** Requires selecting the first open financial period. Enforces that total opening debits equal total opening credits ($\sum \text{Dr} = \sum \text{Cr}$). Posts as a single formal Opening Balance voucher (`OB-2026-000001`).

Screen 3.9.2: Year-End Closings (`YearEndClosingResource`)

- **Navigation:** `ACCOUNTING` $\rightarrow$ `YEAR-END CLOSINGS`
- **Purpose:** Executes formal annual financial year closing and balance transfer.
- **Workflow & Calculation:**
 1. **Calculation:** Sums all Revenue accounts (4000s) and all Expense & Direct Cost accounts (5000s/7000s) for the 12 periods of the fiscal year. Computes Net Profit or Net Loss.
 2. **Closing Journal Creation:** Generates a closing voucher that clears all Revenue accounts to zero (Debit Revenue) and all Expense accounts to zero (Credit Expense), transferring the exact net difference to `3200 Retained Earnings`.
 3. **Period Sealing:** Automatically transitions all 12 financial periods of the closed fiscal year to `LOCKED` status, permanently preventing any subsequent postings.

4. STEP-BY-STEP OPERATIONAL INSTRUCTIONS

This section provides step-by-step instructions for executing standard accounting workflows in the software.

Procedure 4.1: Creating a New Chart of Accounts Leaf Account

- 1 Ensure you are in the correct active company using the top navigation tenant switcher.
- 2 Navigate to **ACCOUNTING** $\rightarrow$ **CHART OF ACCOUNTS**.
- 3 Click the **+ NEW ACCOUNT** button in the top right corner.
- 4 Enter the unique **Account Code** (e.g. **5210**) within the appropriate code range.
- 5 Enter the descriptive **Account Name** (e.g. **Site Generator Maintenance**).
- 6 Select the **Parent Account** (e.g. **5200 Fuel & Power** or **5000 Expenses**).
- 7 Select the **Account Type** (**Expense**) and **Normal Balance** (**Debit**).
- 8 Enter the **Reporting Group** (e.g. **Operating Overheads**) for consolidation mapping.
- 9 If this is a normal posting account, ensure **Is Control Account** is unchecked and **Allows Manual Posting** is toggled ON.
- 10 Click **CREATE**. The account is immediately available for selection in voucher forms.

Procedure 4.2: Preparing, Approving & Posting a Manual Journal Voucher (JV)

- 1 Navigate to **ACCOUNTING** $\rightarrow$ **VOUCHERS / JOURNALS** and click **+ NEW JOURNAL ENTRY**.
- 2 Select **Voucher Type** = **Journal (JV)** and select the current active **Financial Period**.
- 3 Select the **Transaction Date** and enter a detailed **Description** of the adjustment.
- 4 In the **Double-entry lines** repeater, configure the first line:
 - Select the Debit Account (e.g. **5300 Office Rent**) and enter the **Debit Amount** (e.g. **75000**).
 - Select any applicable dimension (e.g. **Cost Center**).
- 5 Configure the second line:
 - Select the Credit Account (e.g. **1111 Head Office Cash**) and enter the **Credit Amount** (e.g. **75000**).
- 6 Click **CREATE** to save the voucher in **DRAFT** state.
- 7 Click the **SUBMIT** button in the top action bar to send the voucher for maker-checker review.
- 8 A different user with Finance Approver rights opens the submitted voucher and clicks **APPROVE**.
- 9 The Finance Controller clicks **POST**. The system assigns **JV-2026-XXXXXX**, locks the record, and immediately updates the General Ledger.

Procedure 4.3: Recording & Posting a Vendor Bill with 3-Way GRN Matching

- 1 Prerequisites: The Purchase Order must be issued, and the Goods Receipt must be inspected and handed over to Accounts.
- 2 Navigate to **TRANSACTIONS** → **VENDOR BILLS & CREDIT NOTES** and click **+ NEW VENDOR BILL**.
- 3 Select **Type** = **Invoice** and select the issued **Purchase Order**.
- 4 Select the **Vendor** and enter the official **Vendor Invoice Number** from the physical bill.
- 5 In the **Invoice Lines** repeater, select the PO line, item, quantity, and agreed unit rate.
- 6 In the **Deductions** section, add any applicable Withholding Tax (WHT) or Retention deductions.
- 7 Click **CREATE** to save in Draft, then click **SUBMIT**. FIFO GRN allocation occurs automatically.
- 8 The Accounts Reviewer clicks **REVIEW MATCH**. If quantities/rates match PO and GRN, status moves to **REVIEWED**.
- 9 The Finance Manager clicks **APPROVE**, followed by the Controller clicking **POST**.
- 10 The system posts the bill as **PUR-2026-XXXXXX**, clears GRNI (**2193**), and records Accounts Payable (**2110**).

Procedure 4.4: Creating a Construction Running Bill (IPC / Progress Claim)

- 1 Navigate to **TRANSACTIONS** → **CUSTOMER INVOICES & CREDIT NOTES** → **+ NEW INVOICE**.
- 2 Select **Type** = **Invoice** and **Category** = **Running Bill**.
- 3 Select the **Customer** and the active construction **Project**.
- 4 Enter the official Consultant **Certificate Number**, **Certificate Date**, and certified **Work Value**.
- 5 In the **Revenue Lines** repeater, select **4100 Construction Revenue** and enter the gross work amount.
- 6 In the **Running-bill deductions** repeater, add:
 - Contract Retention (e.g. 5% or 10% of certified work value).
 - Mobilization Advance Recovery (if advance was received).
 - Withholding Tax (WHT) deduction.
- 7 Click **CREATE**, then click **SUBMIT**.
- 8 After independent approval, click **POST**. The invoice receives number **RB-2026-XXXXXX** and updates AR and Revenue.

Procedure 4.5: Executing a Treasury Outbound Vendor Bill Settlement

- 1 Navigate to **TRANSACTIONS** → **PAYMENTS, RECEIPTS & TRANSFERS** → **+ NEW TRANSACTION**.
- 2 Select **Type** = **Payment**, **Purpose** = **Settlement**, and **Counterparty Type** = **Party**.
- 3 Select the **Party** (Vendor) and enter the total payment **Amount**.
- 4 Select the **Source Account** (e.g. **1120 Bank**) and select the specific **Company Bank Account**.
- 5 Enter the Cheque / Instrument Number, Date, and Narration.
- 6 In the **Open-item allocations** section, select the posted Vendor Bill to settle and enter the allocated amount.
- 7 Click **CREATE**, click **SUBMIT**, obtain Approval, and click **POST**.
- 8 The voucher posts as **PV-2026-XXXXXX**, debits Accounts Payable, credits Bank, and reduces the vendor bill's open balance.

Procedure 4.6: Performing Bank Statement Import & Reconciliation

- 1 Navigate to **TRANSACTIONS** $\rightarrow$ **BANK STATEMENTS** $\rightarrow$ **+ IMPORT STATEMENT**.
- 2 Select the **Company Bank Account**, specify period dates, and upload the normalized bank CSV file.
- 3 Click **UPLOAD & PARSE**. Verify that statement lines load with zero parsing errors.
- 4 Navigate to **ACCOUNTING** $\rightarrow$ **BANK RECONCILIATION** $\rightarrow$ **+ NEW RECONCILIATION**.
- 5 Select the Bank Account and the imported Bank Statement, then click **CREATE**.
- 6 On the view screen, click **MATCH ACTIVITY** to pair statement lines with corresponding posted GL bank vouchers.
- 7 For bank charges or interest appearing only on the bank statement, click **POST ADJUSTMENT** to generate the required GL entry.
- 8 Once the statement balance exactly equals the adjusted GL balance ($\text{Difference} = 0.00\$$), click **CLOSE**.

Procedure 4.7: Managing Petty Cash Floats & Physical Cash Count

- 1 Navigate to **ACCOUNTS** $\rightarrow$ **PETTY CASH REGISTER**.
- 2 To disburse daily expenses: Click **RECORD PETTY EXPENSE**, select the Expense Head, enter amount, optional Project, and narration. Click Save.
- 3 To replenish float: Click **TOP-UP FLOAT**, select Source (**Director Advance** or **Bank Transfer**), enter amount, and click Save.
- 4 At month-end / weekly close: Click **PHYSICAL RECONCILIATION**.
- 5 Count physical notes/coins in the cash box and enter into **Physical Cash Counted**.
- 6 Enter any temporary IOUs/receipts held into **On-Account Cash Held by Staff**.
- 7 Click Save. If variance is zero, the register confirms exact reconciliation; if a shortage/surplus exists, it logs the variance for investigation.

Procedure 4.8: Reversing an Erroneously Posted Voucher

- 1 Open the posted document in its respective module (e.g. **VOUCHERS / JOURNALS**, **VENDOR BILLS**, **CUSTOMER INVOICES**).
- 2 Confirm the document status is **POSTED**.
- 3 Click the red **REVERSE** button in the header action bar.
- 4 In the confirmation modal, select the **Reversal Date** (must be within an active open financial period).
- 5 Enter a mandatory, comprehensive **Reversal Reason** explaining why the reversal is necessary.
- 6 Click **CONFIRM REVERSAL**.
- 7 The system creates a linked reversal entry (**REV-2026-XXXXXX**) swapping all debits and credits, changes the original status to **REVERSED**, releases any consumed GRN or invoice allocations, and updates ledger balances.

5. END-TO-END WORKFLOWS & DOUBLE-ENTRY IMPACTS

This section traces the complete accounting lifecycle across all operational modules with exact debit/credit mechanics.

5.1 Procurement to Payment (P2P) Accounting Trail

EVENT / STEP	TRIGGERING SOFTWARE ACTION	DEBIT ACCOUNT	CREDIT ACCOUNT	BALANCE SHEET / P&L EFFECT
1. PO Issuance	IssuePurchaseOrderAction	No General Ledger Impact (Operational commitment only)		Reserves PR quantity. Budget demand recorded.
2. GRN QA Handover	HandoverGoodsReceiptToAccountsAction	DR 1196 Site Inventory	CR 2193 GRNI Accrual	Increases Current Assets (Stock) & Current Liabilities (GRNI).
3. Vendor Bill Posting	PostVendorBillAction	DR 2193 GRNI Accrual DR 1190 Input GST	CR 2110 Accounts Payable CR 2150 WHT Payable	Clears GRNI liability, records tax asset & net vendor liability.
4. Vendor Settlement	PostTreasuryTransactionAction	DR 2110 Accounts Payable	CR 1120 Bank Account	Decreases Current Liabilities (AP) & Current Assets (Bank).

5.2 Construction Project Costing & Material Issues

OPERATIONAL EVENT	SOFTWARE ACTION	DEBIT ACCOUNT	CREDIT ACCOUNT	ACCOUNTING RESULT
Site Material Issue	PostInventoryTransactionAction	DR 7100s Direct Cost (e.g. 7100 Cement)	CR 1196 Site Inventory	Transfers material asset into active direct construction expense on Job Site.
Direct Site Expense	RecordQuickExpenseAction	DR 7190 Direct Site Labour	CR 1112 Site Petty Cash	Records labour expense, consumes site cash float.
Machinery Rental Accrual	PostVendorBillAction	DR 7200 Machinery Rental	CR 2180 Rental Payable	Charges equipment cost to project, establishes rental liability.

5.3 Order to Cash (O2C) & Progress Billing Trail

EVENT / STEP	TRIGGERING SOFTWARE ACTION	DEBIT ACCOUNT	CREDIT ACCOUNT	FINANCIAL STATEMENT IMPACT
1. Client Advance Received	PostTreasuryTransactionAction	DR 1120 Bank Account	CR 2192 Customer Advance	Increases Bank Asset & Unearned Mobilization Liability.

EVENT / STEP	TRIGGERING SOFTWARE ACTION	DEBIT ACCOUNT	CREDIT ACCOUNT	FINANCIAL STATEMENT IMPACT
2. Running Bill Certified	PostCustomerInvoiceAction	DR 1130 Accounts Rec (Net) DR 1180 Retention Rec DR 1185 WHT Rec DR 2192 Customer Adv	CR 4100 Construction Rev CR 2160 Output GST Payable	Recognizes certified Revenue in P&L, records net AR, retention asset, WHT asset, and reduces customer advance liability.
3. Client Payment Receipt	PostTreasuryTransactionAction	DR 1120 Bank Account	CR 1130 Accounts Receivable	Settles open invoice, increases cash in bank.

5.4 Payroll Accrual & Disbursal Trail

EVENT	ACTION	DEBIT ACCOUNT	CREDIT ACCOUNT	IMPACT
1. Post Approved Payroll	PostPayrollRunAction	DR 5100 Head Office Salaries DR 7190 Direct Labour (Site)	CR 2140 Salary Payable CR 1140 Employee Advances CR 2150 WHT Payable	Accrues gross salary expense across projects & admin, recovers employee loan installments, records net salary liability.
2. Disburse Salary	PostTreasuryTransactionAction	DR 2140 Salary Payable	CR 1120 Bank / 1111 Cash	Clears salary liability via employee bank transfer or cash.

6. FINANCIAL REPORTS & VERIFICATION CATALOG

YM-CMS features a suite of real-time financial reporting pages. Every report derives solely from posted General Ledger entries.

6.1 Core Financial Statements

REPORT NAME	NAVIGATION PATH	KEY FILTERS	AUDITING & VERIFICATION PURPOSE
Trial Balance	REPORTS $\rightarrow$ FINANCIAL STATEMENTS $\rightarrow$ Trial Balance Tab	Financial Year, Period Range, Cost Center.	Displays Opening Balance, Period Debits, Period Credits, and Net Closing Balance for every active account. Proves $\sum \text{Debits} = \sum \text{Credits}$.
General Ledger	REPORTS $\rightarrow$ FINANCIAL STATEMENTS $\rightarrow$ General Ledger Tab	Account ID, Date Range, Party, Project.	Chronological transaction history of any selected account with running balances, voucher numbers, and narration memos.
Profit & Loss (P&L)	REPORTS $\rightarrow$ FINANCIAL STATEMENTS $\rightarrow$ Profit & Loss Tab	Financial Year, Comparative Periods.	Calculates Gross Profit ($\text{Revenue} - \text{Direct Project Costs}$) and Net Operating Profit ($\text{Gross Profit} - \text{Operating Overheads}$).
Balance Sheet	REPORTS $\rightarrow$ FINANCIAL STATEMENTS $\rightarrow$ Balance Sheet Tab	As of Date / Fiscal Period.	Presents financial position: Total Assets = Total Liabilities + Total Equity (including Current Year Net Profit/Loss).

6.2 Subledger Aging & Reconciliation Reports

REPORT NAME	NAVIGATION PATH	COLUMNS / METRICS	OPERATIONAL VALUE
Accounts Payable Aging	REPORTS $\rightarrow$ ACCOUNTS PAYABLE $\rightarrow$ AP Aging	Vendor Name, Total Outstanding, Current (Not Due), 1–30 Days, 31–60 Days, 61–90 Days, 90+ Days.	Assists Treasury in scheduling supplier payments and managing cash flow obligations.
Vendor Ledger	REPORTS $\rightarrow$ ACCOUNTS PAYABLE $\rightarrow$ Vendor Ledger	Vendor Filter, Date Range, Bills, Deductions, Payments, Running Balance.	Official statement sent to suppliers for monthly balance confirmation.
Accounts Receivable Aging	REPORTS $\rightarrow$ SALES & PROJECT PROFITABILITY $\rightarrow$ AR Aging	Customer Name, Total Billed, Current, Overdue Brackets (1–30, 31–60, 61–90, 90+).	Credit control tool for following up on overdue client running bills.
Customer Ledger	REPORTS $\rightarrow$ SALES & PROJECT PROFITABILITY $\rightarrow$ Customer Ledger	Customer Filter, Date Range, Invoices, Retentions, Receipts, Net Balance.	Client statement showing progress billing certifications vs payments.
Project Profitability	REPORTS $\rightarrow$ SALES & PROJECT PROFITABILITY $\rightarrow$ Project Profitability	Project Name, Contract Value, Billed Revenue, Material Cost, Labour Cost, Equipment, Net Margin %.	Evaluates individual construction job profitability and cost performance.

6.3 Treasury, Bank Book & Executive Statements

REPORT NAME	NAVIGATION PATH	LAYOUT & FEATURES
-------------	-----------------	-------------------

Daily Cash & Bank Position	REPORTS\$rightarrow\$ DAILY CASH & BANK STATEMENT	Executive 5-fund statement: Head Office Cash, Site Petty Cash, Company Bank Accounts, Director Funds, Staff Claims. Displays Opening, Inflows, Outflows, and Closing Funds with Print stylesheet.
Bank Book Report	REPORTS\$rightarrow\$ TREASURY & BANKING\$rightarrow\$ Bank Book	Chronological bank ledger by account showing cheque numbers, clearance dates, and running balances.
Petty Cash Register	ACCOUNTS\$rightarrow\$ PETTY CASH REGISTER	Imprest cash ledger with filterable date range, top-up tracking, disbursement analysis, and reconciliation logs.
Monthly Expense Summary Book	REPORTS\$rightarrow\$ MONTHLY EXPENSE SUMMARY	10-sheet corporate roll-up: Admin Expenses, Bidding Expenses, Project Direct Costs, Shared Costs, and Funding Breakdown.
Consolidated Financial Reports	REPORTS\$rightarrow\$ GROUP CONSOLIDATION	Super-Admin multi-company rollup: Aggregates Trial Balance, Balance Sheet, and P&L across all authorized sister entities with Inter-Company eliminations.

7. PRACTICAL BUSINESS SCENARIOS & WALKTHROUGHS

This section walks through realistic business scenarios with exact figures, click sequences, and accounting impacts.

Scenario 7.1: Procurement of 500 Bags of Cement for Construction Project C-21

Business Context: YM Construction issues a PO for 500 bags of Bestway Cement @ PKR 1,400/bag (Total PKR 700,000) for Project C-21. The site receives and accepts 480 bags (20 bags damaged and rejected). The vendor submits invoice for 480 bags (PKR 672,000) with 2% WHT. Accounts approves the bill and pays via Bank Alfalah cheque.

Step-by-Step Software Execution:

- Receive Goods:** Storekeeper goes to **GOODS RECEIPTS** $\rightarrow$ Creates GRN against PO. Receives 500 bags.
- Inspect Goods:** Site Engineer inspects: Enters 480 Accepted, 20 Rejected (Reason: "Torn bags & moisture hardened"). Clicks **INSPECT**.
- Accounts Handover:** Store Supervisor clicks **HANDOVER TO ACCOUNTS**.
 $\rightarrow$ Journal Generated: **DR** 1196 Site Inventory PKR 672,000 | **CR** 2193 GRNI Accrual PKR 672,000.
- Vendor Bill Entry:** AP Accountant goes to **VENDOR BILLS** $\rightarrow$ Selects PO. Enters Vendor Inv # **BW-98421**. Line captures 480 bags @ PKR 1,400 = PKR 672,000. Under Deductions, adds 2% WHT = PKR 13,440. Net Payable = PKR 658,560. Clicks Submit.
- Match Review & Post:** Reviewer performs 3-Way Match (Passes). Approver approves. Controller posts.
 $\rightarrow$ Journal Posted (**PUR-2026-000142**):
DR 2193 GRNI Accrual PKR 672,000
CR 2110 Accounts Payable (Bestway) PKR 658,560
CR 2150 WHT Payable PKR 13,440
- Payment:** Treasury Officer creates Payment Voucher in **PAYMENTS, RECEIPTS & TRANSFERS**.
 - Amount: PKR 658,560. Source: Bank Alfalah (1120).
 - Allocation: Allocates PKR 658,560 against Bill **PUR-2026-000142**. $\rightarrow$ Journal Posted (**PV-2026-000088**):
DR 2110 Accounts Payable PKR 658,560 | **CR** 1120 Bank Alfalah PKR 658,560.

Verification: Vendor Bill status is **PAID**. Vendor Ledger balance is PKR 0.00. Site Inventory shows 480 bags in stock.

Scenario 7.2: Issuing 300 Bags of Cement to Project C-21 Foundation Casting

Business Context: Site supervisor requisitions 300 bags of cement from site store for pouring foundation raft on Project C-21.

- Navigate to **TRANSACTIONS** $\rightarrow$ **INVENTORY TRANSFERS & ISSUES** $\rightarrow$ **+ NEW TRANSACTION**.
- Select **Type** = **Project Issue** and select **Project** = **C-21 Commercial Tower**.
- In Lines: Select Item = **Bestway Cement**, Quantity = **300**, Posting Account = **7100 Cement Cost**.
- Click Submit and Post. The system values the issue at the current moving average cost ($300 \times \text{PKR } 1,400 = \text{PKR } 420,000$).
- Journal Posted (**IA-2026-000034**):
DR 7100 Cement (Direct Project Cost) [Project: C-21] PKR 420,000
CR 1196 Site Inventory [Store: C-21 Site Store] PKR 420,000

Verification: Project Expense Ledger for C-21 reflects PKR 420,000 under Materials. Store stock balance reduces to 180 bags.

Scenario 7.3: Submitting Running Bill #4 for Commercial Plaza Project

Business Context: YM Construction submits certified Running Bill #4 for Project C-21: Certified Work Value = PKR 2,500,000. Contract terms: 5% Retention (PKR 125,000), 10% Mobilization Recovery (PKR 250,000), 7.5% WHT (PKR 187,500). Net Receivable from Client = PKR 1,937,500.

1. Navigate to **TRANSACTIONS** $\rightarrow$ **CUSTOMER INVOICES & CREDIT NOTES** $\rightarrow$ **+ NEW INVOICE**.
2. Select **Type** = **Invoice**, **Category** = **Running Bill**, Customer = **Al-Falah Properties**, Project = **C-21 Commercial Tower**.
3. Enter Certificate # **IPC-004**, Work Value = **2500000**.
4. Revenue Line: **4100 Construction Revenue** = PKR 2,500,000.
5. Deductions:
 - Retention (5%): PKR 125,000.
 - Customer Advance Recovery (10%): PKR 250,000.
 - WHT Receivable (7.5%): PKR 187,500.

6. Submit, Approve, and Post.

$\rightarrow$ **Journal Posted (RB-2026-000019):**

DR	1130 Accounts Receivable (Al-Falah)	PKR 1,937,500
DR	1180 Retention Receivable [C-21]	PKR 125,000
DR	1185 WHT Receivable	PKR 187,500
DR	2192 Customer Mobilization Advance	PKR 250,000
CR	4100 Construction Revenue [C-21]	PKR 2,500,000

Verification: Profit & Loss Statement displays PKR 2.5M revenue. AR Aging schedules PKR 1.937M under Current bracket. Mobilization liability reduces by PKR 250K.

Scenario 7.4: Director Pays PKR 300,000 Office Rent from Personal Bank Account

Business Context: Director personally transfers PKR 300,000 from personal account to pay 3 months head office rent.

1. Navigate to **ACCOUNTS** $\rightarrow$ **QUICK EXPENSE ENTRY**.
2. Select Date = Today, Category = **Office Rent**, Amount = **300000**.
3. Select **Paid Via / Funded By** = **Director Advance / Funded**. Enter Narration = **3 months HO rent paid by Director**.
4. Click Submit. The system automatically creates, balances, and submits the voucher:

$\rightarrow$ **Journal Posted (JV-2026-000211):**

DR	5300 Office Rent	PKR 300,000
CR	2220 Director Loans / Financing	PKR 300,000

Verification: Office Rent expense is recognized immediately in P&L. Director Expense Ledger reflects PKR 300,000 credit balance owed to the director.

8. BUSINESS RULES, ACCOUNTING POLICIES & CONTROL MATRIX

The software strictly enforces the following accounting and operational rules. Violations will trigger validation exceptions and block transaction posting.

8.1 Multi-Company Tenancy & Boundary Rules

- **Tenant Isolation:** No database query can span multiple companies unless executing within the authorized Super-Admin Consolidation Service.
- **Cross-Company Foreign Keys:** A journal entry in YM Construction cannot link to a bank account, project, or party owned by BMC Construction. Such payloads are rejected by model validation policies.
- **Inter-Company Accounting:** Inter-company fund movements or cost allocations must execute through paired bilateral vouchers utilizing accounts `1198 Due from Related Companies` and `2195 Due to Related Companies`.

8.2 Maker-Checker Segregation of Duties Matrix

FUNCTIONAL OPERATION	PREPARER (MAKER)	REVIEWER / INSPECTOR	APPROVER (CHECKER)	POSTING AUTHORITY
Manual Journal Vouchers	Accounts Officer	Senior Accountant	Finance Manager (Must $\neq$ \$ Maker)	Financial Controller
Material Receiving & Stock	Store Receiver	Site QA Engineer	Store Supervisor	Accounts Officer (Handover)
Vendor Bills (AP)	Procurement Officer	AP Reviewer (3-Way Match)	Finance Manager (Must $\neq$ \$ Maker)	Financial Controller
Customer Invoices (AR)	Billing Engineer	Project Manager	Finance Manager (Must $\neq$ \$ Maker)	Financial Controller
Treasury Payments	Treasury Officer	Internal Auditor	CFO / Director	Bank Signatory / Cashier
Bank Reconciliation	Treasury Accountant	Senior Accountant	Finance Manager	Financial Controller
Fixed Asset Depreciation	Asset Officer	Senior Accountant	Finance Manager	Financial Controller
Fiscal Year-End Close	Head of Accounts	External Auditor	Chief Financial Officer	Board of Directors

8.3 Ledger Posting & Validation Rules

- **Debit / Credit Equality:** Total debit lines must mathematically equal total credit lines ($\sum Dr = \sum Cr$) at 4 decimal places. Off-balance vouchers cannot be submitted.
- **Active Leaf Node Rule:** Postings can only occur on leaf accounts with no child accounts. Parent and summary accounts reject postings.
- **Control Account Rule:** Accounts marked `is_control_account = true` reject manual journal voucher entry. They can only be posted via dedicated subledger workflows.
- **Open Financial Period Rule:** Transactions must fall within an active OPEN financial period. Closed and Locked periods reject postings.
- **Zero Negative Inventory:** Material issues or trading sales that would cause on-hand site inventory to fall below zero (`quantity > 0`) are blocked by database row locks.

- **No Statutory Rate Hardcoding:** Sales tax and withholding tax rates must use active, effective-dated TaxCode records. No rate is hardcoded in the source code.

9. COMPREHENSIVE DIAGNOSTIC & TROUBLESHOOTING GUIDE

Use this matrix to diagnose, resolve, and verify common accounting and operational issues encountered during daily system usage.

SYMPTOM / ERROR	UNDERLYING ROOT CAUSE	RESOLUTION PROCEDURE	VERIFICATION STEP
"Cannot post journal: Period is closed or locked"	The transaction date falls within a monthly period whose status is CLOSED or LOCKED .	1. Check transaction date. 2. If date is correct, an authorized manager must navigate to FINANCIAL PERIODS and click REOPEN PERIOD with a documented reason.	Period status displays OPEN ; retry posting.
"Maker cannot approve/post their own transaction"	Segregation of duties violation: The user attempting to approve or post created or submitted the document.	A different user with appropriate checker/approver role credentials must log in and execute the approval action.	Approval timestamp records the independent user ID.
"Total debits must equal total credits"	The sum of debit line amounts does not match the sum of credit line amounts.	Review all voucher lines. Recalculate debits vs credits. Adjust line amounts or add balancing discount/tax line.	Voucher header reflects \$Delta = 0.00\$; Submit button enables.
"Account does not allow manual posting"	The selected account is a Control Account (e.g. 1130 AR, 2110 AP, 1196 Inventory) or a parent group account.	1. Use the appropriate operational screen (e.g. Vendor Bill for AP, Customer Invoice for AR). 2. Or select an allowed leaf expense/liability account.	Form saves without validation error.
"Insufficient stock on hand (Negative inventory prohibited)"	Attempted material issue or trading sale quantity exceeds physical stock available in the selected site store.	1. Verify site store selection. 2. Check if pending Goods Receipts need QA inspection and Accounts Handover. 3. Or post an Inter-Site Transfer from Central Store.	Site Inventory Balances report reflects sufficient on-hand quantity.
"3-Way Match Failed: Price or Quantity Variance"	Vendor Bill unit rate or quantity exceeds issued Purchase Order or accepted GRN quantity.	1. Verify entered bill figures against physical delivery challan. 2. If legitimate, user with Override AP Match permission must check override_mismatch and provide reason.	Bill advances to REVIEWED status.
"Cannot close Bank Reconciliation: Difference > 0.00"	Bank statement closing balance does not equal adjusted General Ledger bank balance due to unmatched items.	1. Ensure all statement lines are matched to GL entries. 2. Post adjustments for bank charges/tax via POST ADJUSTMENT . 3. Verify no duplicate GL vouchers exist.	Reconciliation header displays $\text{\$}\{\text{Variance}\} = 0.00\text{\$}$; Close button activates.
"Petty Cash Physical Count Mismatch"	Physical cash in box does not match system running balance.	1. Check for unrecorded cash receipts/disbursements. 2. Verify on-account cash held by staff. 3. If unexplained, record physical count with notes; system logs variance audit.	Petty Cash Reconciliation log records variance and notes.

10. QUICK REFERENCE GUIDE & TECHNICAL GLOSSARY

10.1 Voucher Type & Prefix Reference Table

PREFIX	VOUCHER TYPE	VOUCHER ENUM KEY	STANDARD USAGE DESCRIPTION
JV	Journal Voucher	journal	General manual adjustments, accruals, prepayments, depreciation.
PV	Payment Voucher	payment	Bank and cash disbursements, vendor settlements, expense payments.
RV	Receipt Voucher	receipt	Bank and cash inflows, customer invoice receipts, advances.
CV	Contra Voucher	contra	Transfers between same-company bank accounts and cash boxes.
PUR	Purchase Voucher	purchase	Posted vendor invoices, subcontractor bills, direct material purchases.
SAL	Sales Voucher	sales	Posted customer service invoices and commercial trading sales.
RB	Running Bill	sales (running_bill)	Certified construction progress claims and client IPCs.
DN	Debit Note	debit_note	Authorized debit adjustments to vendor or customer accounts.
CN	Credit Note	credit_note	Authorized credit adjustments to vendor or customer accounts.
OB	Opening Balance	opening_balance	Historical opening trial balance migration voucher.
PAY	Payroll Voucher	payroll	Monthly salary accruals and staff advance recoveries.
DEP	Depreciation Voucher	depreciation	Monthly automated straight-line asset depreciation runs.
IA	Inventory Adjustment	inventory_adjustment	Material issues to jobs, store transfers, stock adjustments.
REV	Reversal Voucher	reversal	Linked system reversal cancelling an erroneously posted voucher.
IC	Inter-Company	inter_company	Bilateral shared cost allocations between group companies.

10.3 Key Accounting & Technical Terms

- **Control Account:** An aggregated General Ledger account (such as Accounts Payable or Accounts Receivable) whose balance reflects the total of all individual accounts in a subsidiary ledger. Direct manual posting is blocked.
- **GRNI (Goods Received Not Invoiced):** A temporary current liability account used to accrue material costs received on site before the official vendor invoice is matched and posted.
- **IPC (Interim Payment Certificate) / Running Bill:** A progress billing claim in construction contracting certified by an independent supervising engineer/architect based on percentage of completed site work.
- **Retention Money:** A contractually stipulated percentage (typically 5% to 10%) deducted from progress payments and retained by the employer to guarantee defect liability rectification.
- **Withholding Tax (WHT):** Statutory income tax deducted at source from vendor payments and customer receipts, remitted to tax authorities.
- **Moving Weighted Average Cost:** An inventory valuation methodology wherein unit cost is recalculated automatically upon every new material receipt: $\text{New Avg Rate} = (\text{Old Value} + \text{New Inward Value}) / (\text{Old Qty} + \text{New Qty})$.
- **Contra Voucher:** An internal accounting voucher recording transfers of cash and bank funds between two accounts belonging strictly to the same corporate entity.
- **Maker-Checker:** An authorization framework requiring a transaction to be initiated by one individual (Maker) and independently reviewed and authorized by a distinct individual (Checker).
